

Teachers are Talking about *Every Day Counts*. . .

"Our district has demonstrated a steady and upward trend in state test scores for 5th grade since 2000. We believe EDC calendar use in every classroom K-5 is a big part of this success! The alignment with state standards and with district benchmarks is remarkable and the daily review and/or introduction to grade level concepts allows differentiation of learning over the whole year."

Sheryl Hobbs, Principal & Elementary Math Curr.

Specialist

Chamberlin Elementary

Colorado Springs, CO

"Since starting this program, I have noticed the children's increased interest in numbers, patterns, and grouping. Through daily exposure to *Every Day Counts*, the children are gaining a true understanding of numbers and a firm foundation in a variety of mathematical concepts."

Lisa Bonfiantini, Teacher

Public School 75

Bronx, NY

"You can pass on that I love it! I teach fourth grade, and it was helpful when doing multiplication to have all the multiples on the counting tape. The kids love trying to figure out a new pattern every month on the calendar, and it has been a good introduction to geometry."

Kimberly Nirk, Teacher

Zieger Elementary School

Puyallup, WA

"The daily practice and discussion not only reinforces needed math skills, but it also serves to put math into a 'real world' and practical experience. Additionally, it serves as a conduit for pre-learning skills that will be reinforced at a later time. "

Everett Hall, Teacher

Sacajawea Elementary School

Great Falls, MT

"The *Every Day Counts* board was a hit with my kids because it was interactive and it was not from a book. It was almost difficult to convince them that it was math! It dovetailed into so many areas that the book covers anyway, it was either a great introduction or a great review for many concepts."

Linda Hoerling-Glenn, Teacher

Waller Road Elementary School

Tacoma, WA

"The children really look forward to the time we spend on *Every Day Counts*. The children readily understand new concepts when we get to certain chapters in the math book that have been covered during our *Every Day Counts* time."

Patricia Custance, Teacher
Hardwood Elementary School
Sterling Heights, MI

"I love it, the kids love it and it has helped with so many tough concepts. I love all the concepts it covers in such a short amount of time. It takes just a few minutes and the kids look forward to it. I change a few things here and there to accommodate myself and certain situations, but for the most part I stick to it...Kudos!!!"

Kim Gillihan, Teacher
Hilltop Elementary School
Edgewood, WA
