

**Teachers are Talking about *Every Day in
Pre-K: Math. . .***

"Students enjoyed doing the activities while learning the concepts...My students actively participated in each element of the calendar every day. I feel my students have a stronger foundation in each of the math concepts. They are reinforced each month and go a little more in-depth. I used the discussion question to get them to think and talk about math."

Lani Gabriel, Pre-K Teacher
Nottingham Country
Katy, TX

"The Teacher's Guide booked walked me through each activity step-by-step and is loaded with 'helpful hints' to help me connect with the children. The *Every Day in Pre-K: Math* has been a great addition to our learning curriculum. It is a teaching tool that has been very useful and effective with my three year old classroom. The children and I enjoyed learning while we play. Thank you!"

JoAnn Angle, Pre-school Teacher
The Robin's Nest
Palm Harbor, FL

"We really love the calendar and the kids enjoy the patterning. The number bear is a lot of fun."

Naomi Carman, Associate Teacher
The Robin's Nest
Palm Harbor, FL
